50 GODINA UZ HEPU®

50 YEARS OF HEPU®

Više od 50 godina HEPU® je poznat kao vodeći proizvođač visokokvalitetnih vodenih pumpi za motorna vozila. Svugdje gdje motori rade i vozila se koriste za mobilnost i transport, traženi su originalni proizvodi marke HEPU®. Naše akumulirano znanje, sveobuhvatan kvalitet proizvoda, visoka pouzdanost isporuke i bliski odnosi s kupcima učinili su nas vodećim njemačkim proizvođačem vodenih pumpi na nezavisnom tržištu rezervnih dijelova. HEPU® proizvode možete pronaći kod specijalista za automobile, u radionicama i servisnim centrima širom svijeta.

For more than 50 years HEPU® is known as leading manufacturer of high quality water pumps for motor vehicles. Wherever motors run and vehicles are used for mobility and transport, genuine HEPU® brand products are in demand. Our accumulated know-how, comprehensive product quality, high supply reliability and close customer relations have made us the leading German producer of water pumps in the independent aftermarket. You will find HEPU® products at automotive specialists, workshops and repair centres all over the world.

Originalni HEPU®
Sigurna odluka

Original HEPU®
The safe decision

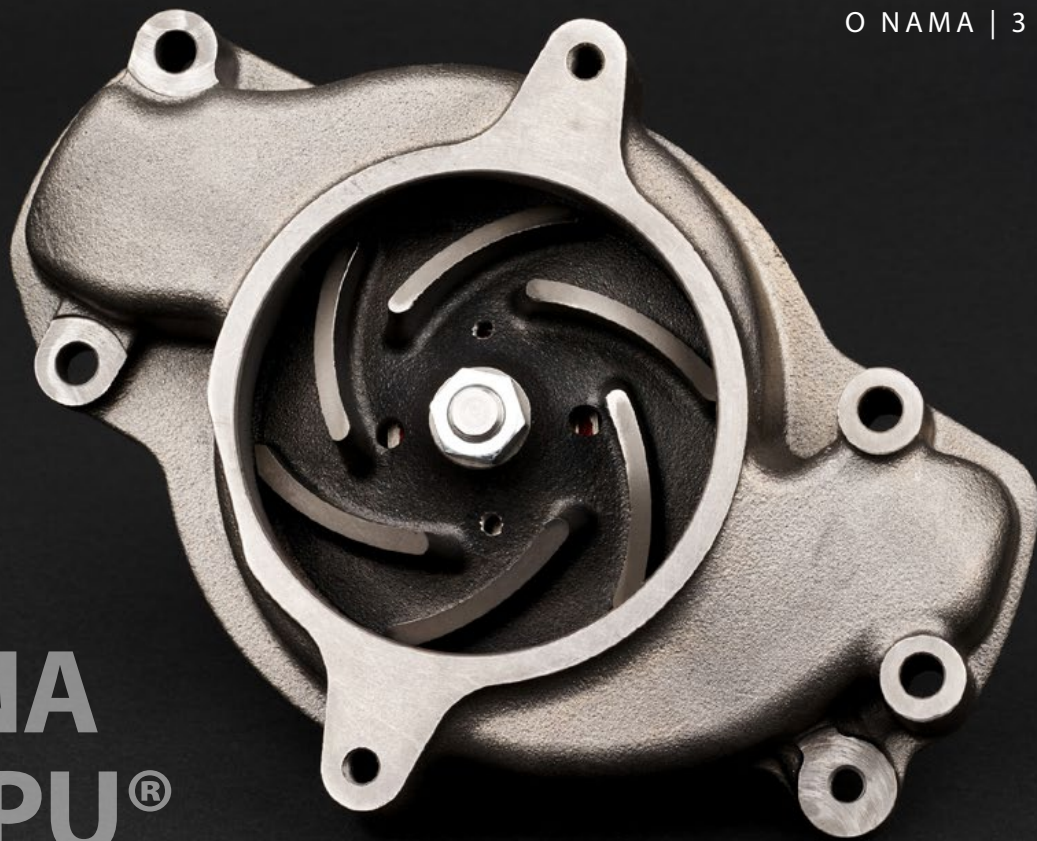

Raznolikost, inovacija i usluga

Nudimo širok asortiman rezervnih dijelova kao što su vodene pumpe, pomoćne pumpe, kompleti vodenih pumpi, kompleti zupčastih remena, kompleti razvodnih lanaca, ventili za rashladnu tečnost, termostati i druge atraktivne i zanimljive linije proizvoda. Naša dugoročna saradnja s vodećim proizvođačima originalne opreme garantuje najviše standarde kvaliteta i apsolutnu pouzdanost za sve HEPU® proizvode. Zahvaljujući velikom centralnom skladištu HEPU®, naši partneri se mogu osloniti na konstantnu dostupnost, brze rokove isporuke i pouzdanu obradu narudžbi.

Variety, Innovation & Service

We supply a comprehensive range of spare part programs such as water pumps, auxiliary pumps, water pump kits, timing belt kits, timing chain kits, coolant valves, thermostats and more attractive and interesting product lines. Our long-term cooperation with the leading OE-manufacturers guarantees the highest standards of quality and absolute reliability for all HEPU® products. Thanks to the large HEPU® central warehouse, our partners can rely on high availability, fast delivery times and reliable order processing.

HEPU® VODENE PUMPE

HEPU® WATER PUMPS

Sve HEPU® vodene pumpe podvrgnute su rigoroznim ispitivanjima kako bi se osigurale vrhunske performanse i izdržljivost. Specijalni ležajevi i kaljene osovine pružaju visoku nosivost pod svim opterećenjima. Visokotehnološki mehanički zaptivači praktično eliminišu prerano curenje, a precizna izrada svih komponenti osigurava pravilno prijanjanje, lakšu ugradnju i vrhunske performanse.

All HEPU® water pumps are subjected to rigorous testing to assure superior performance and endurance. Special bearings and case-hardened spindles provide high load capacity under all stresses. High-tech mechanical seals virtually eliminate premature leaks and the precise manufacturing of all components assures proper fit, easier installation and superior performance.

Odličan protok rashladne tečnosti maksimalna efikasnost

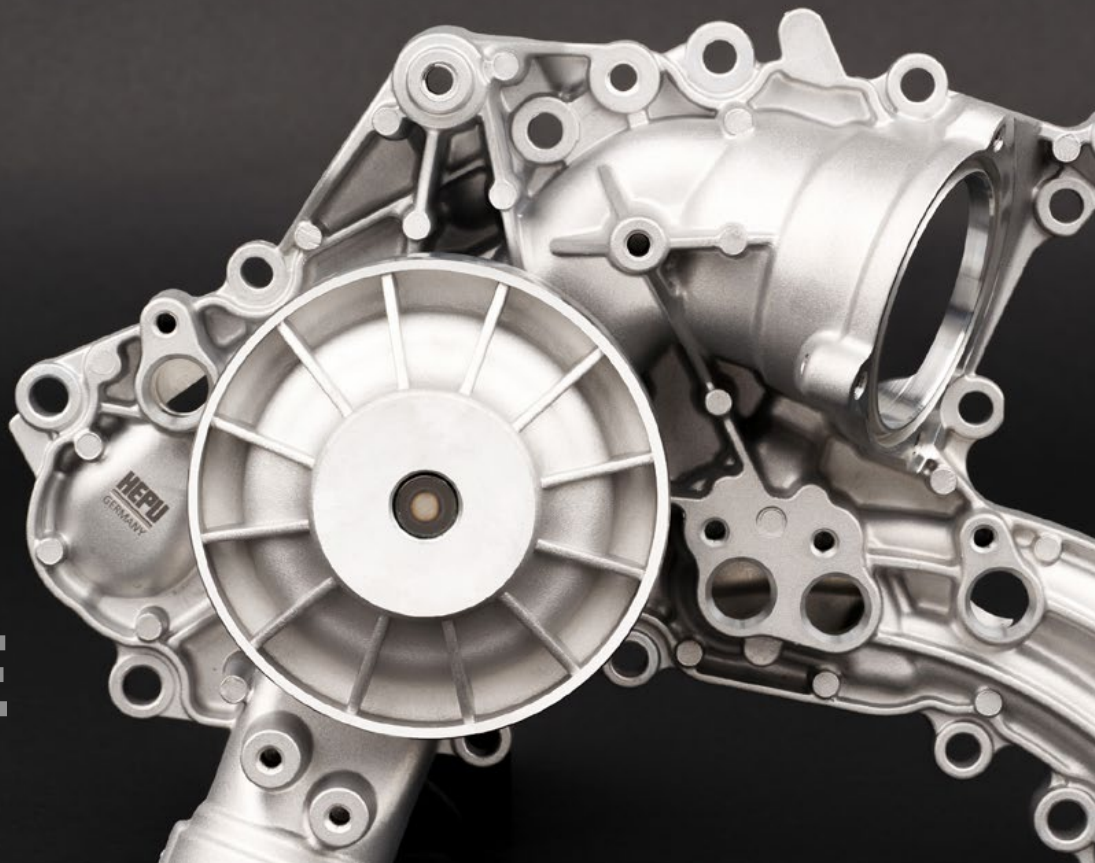

HEPU® vodene pumpe nude izvanredan protok rashladne tečnosti, bilo u normalnim uslovima vožnje, u stanju mirovanja ili pri velikim brzinama. Ove impresivne hidraulične performanse zagarantovane su pouzdanom tehnologijom zaptivanja, zaštitom od korozije, otpornošću na kavitaciju i upotrebom visokokvalitetnih komponenti. HEPU® vodene pumpe postižu optimalnu efikasnost uz maksimalnu otpornost na pritisak. Ovo ne samo da omogućava HEPU® vodenim pumpama zaštitu od pregrijavanja, već istovremeno poboljšava potrošnju goriva i smanjuje emisije zagađivača.

Excellent coolant flow through maximum efficiency

HEPU® water pumps offer an outstanding coolant flow rate whether in normal driving conditions, stationary or travelling at high speeds. This impressive hydraulic performance is guaranteed through reliable sealing technology, corrosion protection, cavitation resistance and the use of high quality components. HEPU® water pumps achieve optimal efficiency with maximum pressure resistance. This not only enables HEPU® water pumps to protect against over-heating, but at the same time improves fuel consumption and reduces pollutant emissions.

VODENE PUMPE

Remenice su napravljene od sinterovanog metala i osiguravaju optimalan prijenos snage sa zupčastog remena na vodenu pumpu.

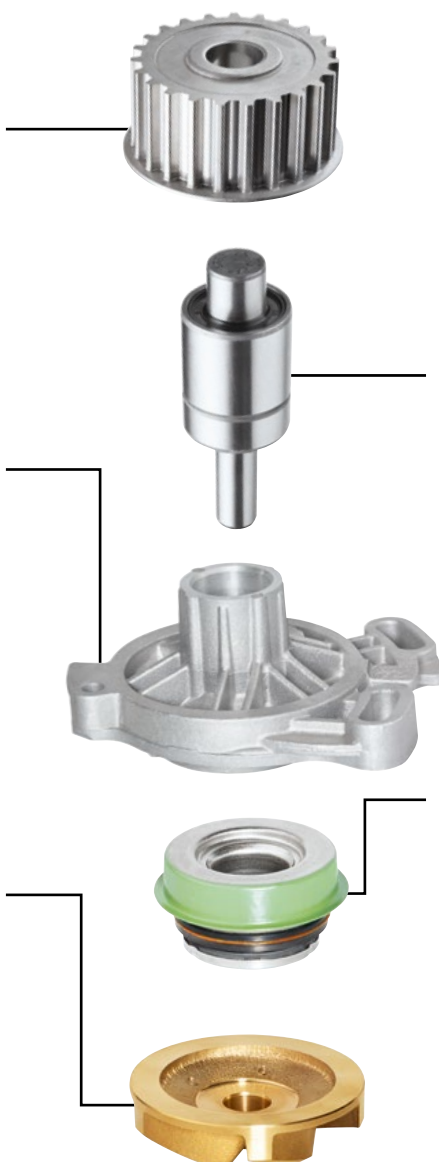

The pulleys are made of sintered metal and ensure optimum power transfer from the timing belt to the water pump.

Čvrsta kućišta pumpi sastoje se gotovo isključivo od visokokvalitetnog lijevanog aluminija. Precizna obrada osigurava savršenu tačnost dimenzija i jednostavnu ugradnju.

The strong pump housings consist almost exclusively of high quality cast aluminium. The precision machining ensures perfect dimensional accuracy and easy installation.

Protokom optimizirani i na koroziju otporni impeleri nude maksimalan protok rashladne tečnosti i efikasnost, garantujući konstantno i učinkovito hlađenje motora.

Flow-optimised and corrosion-resistant impellers offer maximum coolant flow and efficiency, guaranteeing constant and efficient engine cooling.

Napredna tehnologija i 100% OEM kvalitet

*Advanced Technology
and 100 % OEM Quality*

Masivni ležajavi s kugličnim i valjkastim ležajevima osovine su dizajnirani za najveća aksijalna i radijalna naprezanja, osiguravajući besprijekorno korištenje čak i pri dugotrajnom radu na velikim brzinama.

The massive bearing units with ball and roller spindle bearings are designed for the highest axial and radial stresses, ensuring servicefree use even with longterm operation at high rotations.

Korištenjem najsavremenije vrhunske SIC tehnologije zaptivanja s karbonskim i keramičkim prstenovima, sve HEPU® vodene pumpe garantuju optimalnu nepropusnost i dugotrajnost.

By using the most up to date superior SIC sealing technology with carbon and ceramic rings, all HEPU® water pumps are guaranteeing optimal leak tightness and longevity.

HEPU® KOMPLETI VODENE PUMPE

HEPU® WATER PUMP KITS

**PREMIUM
QUALITY**

Profesionalni komplet za popravku

Profesionalci to znaju već dugo i biraju siguran način prilikom zamjene zupčastog remena: istovremeno mijenjaju zatezače i remenice, kao i vodenu pumpu. Sa HEPU® kompletima vodenih pumpi nudimo sigurno i ekonomično kompletno rješenje. Garantuje brze popravke bez problema, a samim tim i zadovoljne kupce.

HEPU® program upotpunjuje širok asortiman kompleta zupčastih remena i kompleta klinastih remena apsolutnog OE kvaliteta.

The professional repair kit

Professionals have known it for a long time and choose the safe way when replacing the timing belt: they change the tensioners and deflection pulleys as well as the water pump all at the same time. With HEPU® water pump kits we offer the safe and economic complete solution. It guarantees quick repairs without problems, and consequently also satisfied customers.

The HEPU® program is completed by a wide range of timing belt kits and V-ripped belt kits in absolute OE quality.

Da bi se garantovao savršen rad i efikasnost cijelog sistema remenskog pogona, važno je da sve komponente rade bez problema i savršeno usklađeno. Stoga sve komponente HEPU® kompleta vodenih pumpi ispunjavaju stroge zahtjeve originalne opreme. Pored vodene pumpe, svi HEPU® kompleti sastoje se od zatezača i zateznih remenica, kao i zupčastih remena i pribora za montažu koje proizvode vodeći dobavljači originalne opreme.

Sadržaj:

- Vodena pumpa
- Zupčasti remen
- Zatezači i remenice
- Dodaci

To guarantee the perfect operation and efficiency of the entire belt drive system it is important that all components work smoothly and perfectly together. Therefore all components of the HEPU® water pump kits meet the strict requirements of original equipment. Besides the water pump, all HEPU® kits consist of tensioners and deflection pulleys as well as timing belts and mounting accessories manufactured by leading original equipment suppliers.

Content:

- Water pump
- Timing belt
- Tensioners and pulleys
- Accessories

POMOĆNE PUMPE

HEPU® POMOĆNE PUMPE

HEPU® AUXILIARY PUMPS

**PREMIUM
QUALITY**

Kada su u pitanju zadaci hlađenja i grijanja neovisni o brzini, sve se više koriste elektroničke pomoćne vodene pumpe.

HEPU® nudi kompletan asortiman pomoćnih i cirkulacionih vodenih pumpi u originalnom kvalitetu opreme za profesionalnu upotrebu u radionicama.

Primjene:

- Parking grijač
- Hlađenje nakon rada
- Hlađenje EGR ventila i turbopunjača
- Hlađenje baterije i elektronskih komponenti kod hibridnih i električnih vozila

When it comes to speed-independent cooling and heating tasks, more and more electronic auxiliary water pumps are being used.

HEPU® offers a complete range of auxiliary and water circulation pumps in original equipment quality for professional workshop use.

Applications:

- Parking heater
- After-run cooling
- EGR & turbocharger cooling
- Cooling of battery & electronic components in hybrid and electric vehicles

VODENE PUMPE ZA KAMIONE

HEPU® VODENE PUMPE ZA KAMIONE

HEPU® TRUCK WATER PUMPS

**PREMIUM
QUALITY**

Već dugi niz godina, brend HEPU® predstavlja najviši kvalitet, uslugu i pouzdanost u oblasti tehnologije hlađenja. Ovi visoki standardi primjenjuju se i na naš širok asortiman proizvoda za vodene pumpe za komercijalna vozila. Savršeno obrađena kućišta osiguravaju precizno prijanjanje, a visokokvalitetne komponente garantuju nesmetan kontinuirani rad čak i pod najvećim opterećenjima.

Za većinu primjena u Evropi nudimo odgovarajuće rezervne dijelove u OE kvalitetu. Bez obzira da li se radi o putničkom automobilu, transporteru ili kamionu – uvijek imamo pravu vodenu pumpu za vas!

Uvjerljive performanse:

- Vrhunski kvalitet za najveću pouzdanost
- Ležajevi koji ne zahtijevaju održavanje
- Optimalna čvrstoća i dugotrajnost
- Širok asortiman za kamione i autobuse

For many years, the brand HEPU® means highest quality, service and reliability in the field of cooling technology. These high standards apply also to our wide product range for water pumps for commercial vehicles. Perfectly machined housings ensure an exact fit and high-quality components guarantee trouble-free continuous operation even under the highest loads.

For most European applications we offer the right spare part in OE quality. No matter if passenger car, transporter or truck – we always have the right water pump for you!

Convincing Performances:

- Premium quality for highest reliability
- Maintenance-free bearing units
- Optimum tightness and longevity
- Wide range for trucks and busses

HEPU® KOMPLETI RAZVODNIH LANACA

HEPU® TIMING CHAIN KITS

**PREMIUM
QUALITY**

Savršena veza

Lančani pogon je jak koliko i svaki od povezanih dijelova unutar cijelog sistema! Pri velikoj kilometraži, razvodni lanci i ostale komponente lančanog pogona se troše. Stoga je neophodno zamijeniti sve važne dijelove istovremeno. Ovo je ekonomično i sigurno rješenje.

The perfect connection

The chain drive is only as strong as each of the connected parts within the whole system! At high mileage the timing chains and other components of the chain drive parts are wearing out. Therefore it is essential to replace all important parts at the same time. This is the economic and safe solution.

Lančani, klizne vodilice, valjkasti lanci i potreban pribor za montažu: Svi sastavni dijelovi su savršeno usklađeni i podliježu strogim kontrolama kvaliteta. Upotreba cijelih kompleta nudi savršenu zaštitu od kvarova, oštećenja i reklamacija.

Uvjerljive prednosti:

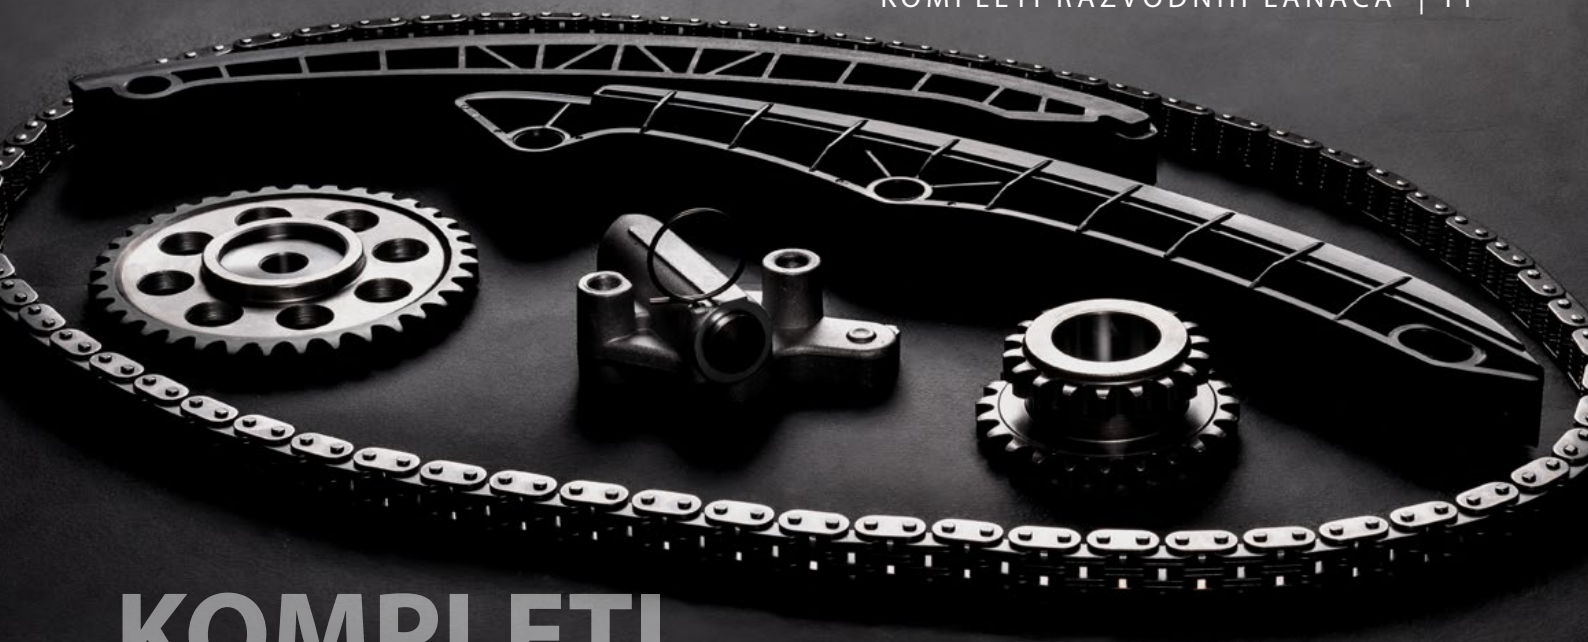

- Optimalna operativna sigurnost motora
- Precizan raspored svih dijelova u kompletima
- Širok asortiman proizvoda
- Testirani, vrhunski kvalitet svih dijelova

Chain wheels, slide rails, roller chains and the needed assembly accessories: All component parts are perfectly matched and subject to strict quality controls. The use of complete kits offers the perfect protection against failure, damage and warranty claims.

Convincing Advantages:

- Optimum operational safety for the engine
- Precise assignment of all parts in the kits
- Wide product range
- Tested, premium quality of all parts

KOMPLETI RAZVODNIH LANACA

PODEŠIVAČ BREGASTOG VRATILA I KONTROLNI VENTILI

CAMSHAFT ADJUSTER & CONTROL VALVES

**PREMIUM
QUALITY**

Interakcija svih komponenti sistema upravljanja motorom je složen proces koji mora nesmetano funkcionisati u svakom trenutku. U suprotnom, to može dovesti do velikog kvara motora. HEPU® podešivači bregastog vratila i regulacijski ventili omogućavaju efikasno smanjenje emisija i potrošnje goriva, povećanje obrtnog momenta i nesmetan rad podešavanjem vremena otvaranja ventila.

Uvjerljive prednosti:

- Sigurnost za kontrolu motora
- Otpornost na visok pritisak i temperaturu
- Povećanje obrtnog momenta i snage

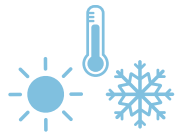

The interaction of all components of the engine management system is a complex process that has to function smoothly at all times. Otherwise it can lead to a major engine failure. HEPU® camshaft adjusters and control valves provide efficient reduction of emissions and fuel consumption, torque gain, and smooth running by adjusting valve opening time.

Convincing advantages:

- Safety for engine control
- High pressure and temperature resistance
- Torque and power increase

HEPU® UPRAVLJANJE TEMPERATUROM

HEPU® THERMO-MANAGEMENT

**PREMIUM
QUALITY**

Sistem hlađenja modernih vozila sastoji se od velikog broja složenih komponenti. Samo nesmetana interakcija svih ovih dijelova garantuje savršenu kontrolu hlađenja i upravljanje temperaturom.

Pod robnom markom HEPU® sada nudimo sveobuhvatan asortiman dijelova za upravljanje temperaturom za vozila s motorima s unutarnjim izgaranjem, hibridna i električna vozila, kao što su termostati, cijevi/crijeva, ekspanzijske posude, ventili za rashladne tečnosti i još mnogo toga. Vrhunski kvalitet i odličan dodatak HEPU® programu.

The cooling system of modern vehicles consists of a large number of complex components. Only the smooth interaction of all these parts guarantee perfect control of cooling and thermal management.

Under the HEPU® brand name, we offer now a comprehensive product range of thermo-management parts for combustion, hybrid and electric vehicles such as thermostats, tubes/hoses, expansion tanks, coolants valves and more. Premium quality and an excellent supplement to the HEPU® program.

HEPU® termostati

Termostati su neophodne komponente za sve sisteme hlađenja motora i osiguravaju optimalnu temperaturu motora.

Termostati iz HEPU®-a uvjerljivi su svojim vrhunskim kvalitetom i dugotrajnošću. Naše proizvode karakterizira precizna izrada i visokokvalitetni materijali.

Moderni motori zahtijevaju termostate s različitim radnim karakteristikama i načinima rada. HEPU® termostati savršeno pokrivaju sve nivoe performansi, tehnologije i primjene.

Uvjerljive prednosti:

- Vrhunski kvalitet
- Bez održavanja i dugotrajni
- Precizna kontrola protoka rashladne tečnosti
- Širok asortiman s najnovijim modelima

HEPU® Thermostats

Thermostats are essential components for all engine cooling systems and ensure an optimum temperature level of the engine.

Thermostats from HEPU® are convincing with their premium quality and long durability. Our products are characterized by precise manufacturing and high-quality materials.

Modern engines require thermostats with different operating characteristics and modes of operation. HEPU® thermostats cover all performance, technology and application levels perfectly.

Convincing Advantages:

- Premium quality
- Maintenance free and long-lasting
- Precise control of the coolant flow
- Wide range with the newest models

UPRAVLJANJE TEMPERATUROM

HEPU® Ventili za regulaciju rashladne tečnosti

Ventili za regulaciju rashladne tečnosti su ključne komponente rashladnog sistema i reguliraju protok rashladne tečnosti. U hibridnim i električnim vozilima, ventili rashladne tečnosti i ventili grijača pružaju optimizirano hlađenje i upravljanje temperaturom pomoću savršene kontrole temperature baterije i drugih elektroničkih komponenti.

Za vozila novije generacije, HEPU® nudi širok asortiman elektronski kontroliranih ventila za regulaciju rashladne tečnosti.

Uvjerljive prednosti:

- Savršeno upravljanje temperaturom
- Optimalna kontrola protoka rashladne tečnosti
- Odlične performanse i povećanje efikasnosti
- Širok asortiman s najnovijim modelima

HEPU® Coolant valves

Coolant control valves are essential components in the coolant circuit and regulate the coolant flow rate. In hybrid and electric vehicles coolant valves and heater valves are providing optimized cooling and thermal management through the perfect temperature control of the battery and other electronic components.

For newer generation vehicles, HEPU® offers a wide range of electronically controlled coolant control valves.

Convincing Advantages:

- Perfect thermo-management
- Optimum coolant flow control
- Excellent performance and increasing efficiency
- Wide range with the latest models

CIJEVI ZA RASHLADNU TEČNOST CRIJEVA I CJEVČICE ZA RASHLADNU TEČNOST

HEPU® CIJEVI ZA RASHLADNU TEČNOST CRIJEVA I CJEVČICE ZA RASHLADNU TEČNOST

HEPU® COOLANT PIPES
COOLANT HOSES & TUBES

**PREMIUM
QUALITY**

Kao vodeći stručnjak u oblasti hlađenja vozila, HEPU® nudi sveobuhvatan asortiman cijevi i crijeva za rashladnu tečnost u OE i OE-ekvivalentnom kvalitetu. Sve komponente su dizajnirane za maksimalnu otpornost na temperaturu i pritisak i nude optimalnu tačnost prijanjanja u skladu sa zahtjevima proizvođača vozila.

HEPU® cjevčice i crijeva za rashladnu tečnost predstavljaju savršenu vezu između HEPU® vodenih pumpi, HEPU® termostata i ostalih komponenti HEPU® sistema za hlađenje.

- Dizajnirano prema specifikacijama proizvođača originalne opreme (OEM) za toplinu, pritisak i koroziju
- Visoka otpornost na starenje
- Fleksibilna crijeva za sistem hlađenja i grijanja
- Širok asortiman ekvivalentnog kvaliteta originalne opreme

As a leading specialist in the field of vehicle cooling, HEPU® offers a comprehensive range of coolant pipes and coolant hoses in OE and OE-equivalent quality. All components are designed for maximum temperature and pressure resistance and offer optimum fitting accuracy in accordance with the vehicle manufacturers requirements. HEPU® coolant tubes and hoses are the perfect connection between HEPU® water pumps, HEPU® thermostats and other HEPU® cooling system components.

- Designed according heat, pressure and corrosion OEM specifications
- High ageing resistance
- Flexible cooling system and heating hoses
- Extensive range in OE equivalent quality

EKSPANZIJSKE POSUDE RASHLADNE TEČNOSTI

HEPU® EKSPANZIJSKE POSUDE

HEPU® EXPANSION TANKS

**PREMIUM
QUALITY**

Ekspanzijske posude su još jedna bitna komponenta sistema hlađenja, a njihovi kvarovi mogu dovesti do velikih oštećenja motora zbog porasta pritiska i temperature. Robusne HEPU® ekspanzijske posude kontroliraju rashladnu tečnost koja se širi putem ventila koji se nalazi u čepu i na taj način pouzdano osigurava da pritisak bude u optimalnom rasponu i da sistem za hlađenje bude rasterećen.

Otpornost na temperaturne fluktuacije osigurana je korištenjem visokokvalitetnih materijala i sprječava curenje rashladne tečnosti. Senzori stalno prate nivo napunjenosti, kao i pritisak i temperaturu. Gotovo sve HEPU® ekspanzijske posude opremljene su posebnim zaptivnim čepom i senzorom.

- Visoka otpornost na temperaturne fluktuacije
- Zatvarajući čep s kompenzacijom pritiska
- Integrirani senzori
- Izdržljivost zahvaljujući visokokvalitetnim materijalima

Expansion tanks are another essential component in the cooling system and defects can lead to massive damages in the engine due to the pressure and temperature increase. The robust HEPU® expansion tanks control the expanding coolant through a valve located in the cap and thus reliably ensure that the pressure is in the optimum range and the cooling system is relieved.

The resistance to temperature fluctuations is ensured by using high-quality materials and prevents the leakage of coolant. Sensors permanently monitor the fill level as well as pressure and temperature. Almost all HEPU® expansion tanks are equipped with a special sealing cap and sensor.

- High resistance to temperature fluctuations
- Closing cap with pressure compensation
- Integrated sensors
- Durability due to high-quality materials

HEPU® ULJNE PUMPE

HEPU® OIL PUMPS

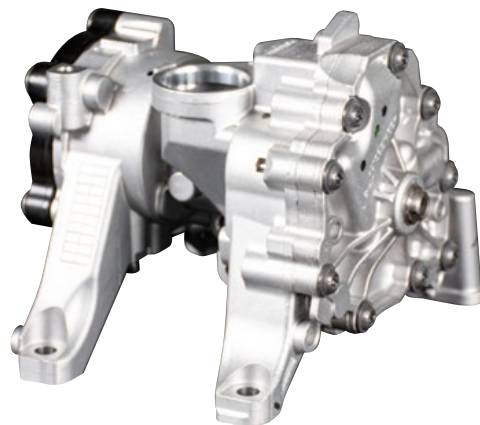

**PREMIUM
QUALITY**

Savršeno podmazivanje motora

Uljna pumpa je jedna od najvažnijih komponenti u motoru. Osigurava dovoljan pritisak ulja tako da motor bude stalno opskrbljen s dovoljno maziva i da se premaz maziva ne kida.

Perfect engine lubrication

The oil pump is one of the most important components in the engine. It ensures sufficient oil pressure so that the engine is permanently supplied with enough lubricant and the lubricating film does not break off.

HEPU® ULJNE PUMPE I KOMPLETI

HEPU® OIL PUMPS & KITS

HEPU® uljne pumpe ispunjavaju najviše standarde kvaliteta i garantuju dug i efikasan vijek trajanja motora čak i pod izuzetnim opterećenjima. Napravljene od izdržljivih i materijala otpornih na koroziju, HEPU® uljne pumpe uvijek osiguravaju optimalnu količinu ulja za pouzdano podmazivanje motora. A precizno proizvedene komponente, savršeno zaptivanje i nesmetan rad osiguravaju bezbrižan kontinuirani rad.

Uvjerljive prednosti:

- Sve tehnologije (varijabilne pumpe, neregulirane pumpe, tandem pumpe)
- Značajno smanjenje trenja i habanja
- Optimalna efikasnost i nesmetan rad
- Kompleti za uljnu pumpu: uključuje lanac i ostale komponente za pametnu popravku

HEPU® oil pumps meet the highest quality standards and guarantee a long and efficient engine life even under exceptional demands. Made of durable and corrosion-resistant materials, HEPU® oil pumps are always providing the optimum oil volume for reliable engine lubrication. And precisely manufactured components, perfect sealing and smooth running ensure trouble-free continuous operation.

Convincing Advantages:

- All technologies (variable pumps, unregulated pumps, tandem pumps)
- Significant reduction in friction and wear
- Optimum efficiency and smooth running
- Oil Pump Kits: incl. chain and other components for a smart repair

TEHNOLOGIJE PUMPI VISOKIH PERFORMANSI

HEPU® VAKUUM PUMPE

HEPU® VACUUM PUMPS

HEPU® vakuum pumpe nude maksimalnu pouzdanost u kvalitet originalne opreme i stalno proizvode potreban vakuum. Čak i pri ekstremnim temperaturnim fluktuacijama i izazovnim radnim uslovima poput vlage i prljavštine, oni pružaju siguran i brz vakuum u konstantnom radu.

- Širok asortiman (mehanički i električni)
- Ekstremna izdržljivost s OE tehnologijom
- Visoka otpornost na uticaje okoline
- Pouzdan u stalnoj upotrebi

HEPU® vacuum pumps offer maximum reliability in original equipment quality and generate the required vacuum permanently. Even at extreme temperature fluctuations and challenging operating conditions such as moisture and dirt, they deliver the vacuum safely and quickly in constant operation.

- Extensive range (mechanical and electrical)
- Extreme durability with OE technology
- High resistance to environmental influences
- Reliable in permanent use

HEPU® PUMPE VISOKOG PRITISKA

HEPU® HIGH PRESSURE PUMPS

HEPU® pumpe visokog pritiska uvjeravaju najvećom preciznošću i ispunjavaju sve zahtjeve za maksimalne performanse i rad s niskim nivoom buke. Optimalnom pripremom smjese osiguravaju visoku efikasnost goriva i istovremeno usklađenost sa standardima emisije.

- Najveća preciznost doziranja
- Pouzdanost u svim uslovima
- Optimalna kontrola smjese
- Visoka efikasnost goriva

HEPU® high-pressure pumps are convincing with highest precision and fulfil all requirements for maximum performance and low-noise operation. Through optimal mixture preparation, they ensure high fuel efficiency and compliance with emission standards at the same time.

- Highest precision for dosing
- Reliability under all conditions
- Optimum mixture control
- High fuel efficiency

HEPU® ADITIVI ZA RASHLADNU TEČNOST

HEPU® COOLANT ADDITIVES

**PREMIUM
QUALITY**

Premium rashladne tečnosti za motore Proizvedeno u Njemačkoj

Sistemi za hlađenje modernih motora postavljaju najviše zahtjeve na kvalitet rashladnih tečnosti u hladnjaku. Originalni HEPU® aditivi za rashladnu tečnost su visoko efikasni antifriz. Oni također štite motor od korozije, pregrijavanja i stvaranja kamenca te garantiraju odličan protok topline za savršene performanse hlađenja. HEPU® program uvijek nudi savršenu rashladnu tečnost za sve tipove vozila i motora.

Premium engine coolants – Made in Germany

The cooling systems of modern engines put the highest demands to the quality of the radiator coolants. Original HEPU® coolant additives are highly effective antifreeze. They protect the engine also from corrosion, overheating and formation of scale and guarantee an excellent heat flow for a perfect cooling performance. The HEPU® program offers always the perfect coolant for all types of vehicle and engines.

Svi HEPU® premium aditivi za rashladnu tečnost ispunjavaju zahtjeve automobilske industrije i predstavljaju odličan dodatak i proširenje programa u kombinaciji s HEPU® vodenim pumpama i kompletima vodenih pumpi.

Asortiman proizvoda:

- Aditivi za rashladnu tečnost
- Antifriz
- Gotova mješavina
- Vjetrobransko staklo – Antifriz / Tečnost za pranje stakala

All HEPU® premium coolant additives meet the requirements of the automotive industry and are an excellent addition and program extension in combination with HEPU® water pumps and water pump kits.

Product range:

- Coolant Additives
- Antifreeze
- Ready-Mix
- Windshield-Antifreeze / Screenwash

ADITIVI ZA RASHLADNU TEČNOST

HEPU® TEČNOST ZA PRANJE I ODMRZAVANJE VJETROBRANSKOG STAKLA

HEPU® SCREENWASH & WINDSCREEN DE-ICER

HEPU® tečnost za pranje vjetrobranskog stakla je pouzdano sredstvo za čišćenje i zaštitu od smrzavanja za sisteme za pranje vjetrobranskog stakla i farova. Također, pogodno za mlaznice ventilatora i polikarbonatna vjetrobranska stakla u putničkim i komercijalnim vozilima. Osigurava jasnu vidljivost bez mrlja i savršenu zaštitu od smrzavanja. Za upotrebu ljeti i zimi. Dostupno u različitim koncentracijama i svim veličinama pakovanja.

HEPU® Screenwash is a reliable cleaning and anti-freeze for the windscreen washer and headlight cleaning systems. Also suitable for fan nozzles and polycarbonate windshields in passenger cars and commercial vehicles. Ensures clear visibility without smears and perfect protection against freezing. For use in summer and winter. Available in various concentrations and all packing sizes.
